

Product Data Sheet

AEL 384 Grease

Description: *AEL 384 Grease* is a heavy-duty, multi-purpose graphite grease particularly useful in aluminum extrusion operations. Typically used in various applications such as lubrication of extrusion dies, die assemblies, dummy blocks, shear blades, and hot billet ends.

Typical Properties:	NLGI Grade	: 3.5
	Graphite	: 10%
	Thickener	: Sodium
	Penetration (@77°F)	: 195 - 235
	Dropping Point	: 360°F
	Color	: Black
	Shelf Life	: 1 year from ship date

Method of Use: *AEL 384 Grease* is not guaranteed to be compatible with other greases- thoroughly remove old grease before using. It can be swabbed on various surfaces that require lubrication. Consistency makes it an ideal working grease for various metallurgical applications.

Precautions: The customary safeguards employed when storing, handling and application should be employed. To prevent contamination, container should be sealed when not in use. Please refer to Material Safety Data Sheet for proper first aid instructions.

Container Size: 35 lb pails or 100 lb drums
